To whom it may concern,

B. A. Construction & Restoration Inc. worked in the heritage restoration of Bell Gairdner Estates with excellent workmanship, attention to detail and high professionalism. The volume of work was approximately \$70,000 and the scope involved the restoration of the stone steps in the retaining walls in the garden.

The project was managed in a timely manner. To optimize the compliance with the original schedule, the company co-operated and co-ordinated the work with all trades involved accommodating the particular needs of each them. The final contract price was on budget including the extra work that was priced and organized efficiently.

B.A. Construction & Restoration Inc. was diligent to resolve all issues arising during construction. Their staff was prompt to find appropriate solutions that contributed to finalize the work to our satisfaction.

I do not hesitate to recommend B.A. Construction & Restoration Inc. and their project manager, Paul Seider; and look forward to working with them again.

Sincerely,

Mark J Vander Helm
