To Whom It May Concern

**Re: B.A. Construction and Restoration Inc.**

---

Dear Sir/Madam:

It is my pleasure to recommend B.A. Construction and Restoration Inc. I worked with B.A. Construction and Restoration Inc. in 2012 on the Southampton Town Hall Clock Tower Restoration Project.

The Southampton Town Hall Clock Tower Restoration Project was in Saugeen Shores (Former Town of Port Elgin). The tender value for the project was \$ 250,000. It consisted of the complete restoration of the exterior of the clock tower. They made sure all environmental protection was in place and maintained during the construction project. Safety was a major component of their work.

During the project there were various challenges that need to be dealt with. When conflicts were identified they were great to work with in developing solutions to keep the project moving forward. When additional work was added they were able to submit pricing to our office in an acceptable time frame and the pricing was quite fair.

B.A. Construction and Restoration Inc. worked at a steady pace throughout the project and worked with the Town to keep us informed of any concerns when they would arise. The staff they had on site were able to make decisions to keep the project moving forward. They were very organized and because of this their sub-contractors were scheduled and arrived on site as soon as the site was ready for them. They worked continuously on the project from start to finish. We worked with them to make sure they were aware of any deficiencies so they could be cleaned up. The last few deficiencies were cleaned up the last days they were on site.

We look forward to working with them on future project.

Yours Truly,

Len Perdue, A.Sc.T.  
Acting Director of Public Works
