Re: BA Construction

To whom it concerns.

BA Construction provided the masonry restoration work for our George Brown Project at 215 King Street East. The project was a full exterior restoration of a 100 year old 4 storey heritage industrial building converting it into classrooms and the George Brown Chef's School flagship restaurant the Chef's House.

Throughout the project BA provided excellent detailed restoration work. Their team was highly skilled, conscientious yet efficient and their pricing for changes was exceedingly fair. I highly recommend them for any heritage masonry restoration work.

Yours sincerely,

DANIEL B. McNEIL OAA MRAIC CAPHC
