

Attention: To Whom it May Concern

File: BA Construction and Restoration
Letter of Reference |

This letter will confirm that BA Construction and Restoration has completed several masonry restoration and repair projects for which CSE was the structural consultant. The projects have included:

- Exterior Repairs Phase 2, Brampton City Hall- Replacement of brick, removal of brick and installation of through wall flashing, weeps and vents and other masonry repair work. Completed in 2007/8.
- Masonry wall repairs, south wall, Nelson Parking Garage, City of Brampton- Replacement of sections of masonry wall at parking garage, including new flashings, weeps and vents. Completed in 2008.
- Masonry Repairs and Brick Replacement, Nelson Parking Garage, City of Brampton- Removal of deteriorated brick and replacement along with new base flashings. Completed as phase 2 of masonry repairs in 2009.

The projects were managed by Paul Seider who was actively involved with site crews. Each project was completed satisfactorily, and work was considered to be well performed. The field crews were cooperative, responding promptly to requests by the owner for scheduling and other changes as work progressed.

We would have no hesitation working with BA Construction and Restoration on any masonry project in the future.

Should you have any further questions please do not hesitate to contact the undersigned.

Yours truly,

Cole Howson, P.Eng.
Project Manager Senior Structural Designer
Carvajal Structural Engineers Inc.
